Regarding: Contact Information Update

Our 2008 SPEED World Challenge Series will be starting soon, I am proud and excited to be involved with one of the most diverse and competitive racing series in the world. My new, primary responsibility here at SCCA Pro Racing is to ensure the continued improvement of vehicle performance parity in the series. Aaron Coalwell will now be the World Challenge Technical Manager for GT and TC, Robert Story continues on as Competition Engineer, whose duties include vehicle homologation and data acquisition / analysis.

I will act as a technical mediator for SCCA Pro Racing so that Aaron and Robert can concentrate on their duties while at the track. I am asking all team owners, crew chiefs, and team engineers that are looking for clarification or changes to the PRR, addendums, VTS's, etc. to contact me with your detailed requests in writing either at the track or by e-mail. I will consider all requests and respond accordingly as quickly as possible. We will have to investigate requests before making a decision so the scale of performance is not tipped out of balance. All decisions will be made with the good of the series as our first priority.

Over the next few weeks I will be contacting some of you personally by phone to discuss any of your needs or concerns. Feel free to discuss anything with me that could improve the SPEED World Challenge series. My staff and I will continue to do our part in maintaining the SPEED World Challenge as the premier road racing series in North America.

Best regards,
