
APPENDIX A.1: NOTES

A.1.1: Under **Manufacturer and Model**, a 1 indicates a vehicle with VTS in Draft form. Changes may be made on an accelerated basis.

A.1.2: Front Axle Weight is calculated using the Rear Axle Weight (%) and the Base Weight (lbs). The minimum front axle weight must be adjusted according to the weight additions mandated and weight exceptions claimed by the team. Teams with questions regarding their official weights should check the reference book located at the official scales.

A.1.3: Under **Front Axle Weight**, a 2 indicates that the number applies to the opposite axle as indicated in the column header.

A.1.4: Under **Rear Axle Weight**, a 3 indicates that the number is a minimum rather than maximum value.

APPENDIX A.2: GRAND TOURING (GT)

A.2.1: FULL ELIGIBILITY

Vehicles listed are eligible to compete in World Challenge GT.

Manufacturer and Model	Engine Displacement (Maximum, CC)	Base Weight (with driver, lbs)	Restrictor and/or Manifold Pressure Limit	Ride Height (Minimum, in)	Front Tire Size (Toyo R888)	Front Wheel (Maximum)	Rear Tire Size (Toyo R888)	Rear Wheel Size (Maximum)	Engine Speed Limit (rpm)
Aston Martin DB9 (06-)	5935	3200	60.8mm (20%)	3.00	275/35	11x18	335/30	13x18	7000
