Decision Date:

## Specification Change

1. Vehicle:

2. VTS / Appendix A Section:

3. Requested Specification:

## Decision

The request is approved. The heads offer similar performance across the RPM range as the existing LS2 heads. The LS3 heads have been reinforced at the location that was prone to failure with the LS2 heads. Ported heads are available from Carl Foltz Engineering, part number CFE LS3 230. These heads require the use of the LS3 intake manifold, GM Part number 12610434. Heads and intake manifold shall not be modified.
