Decision Date:

## Specification Change

1. Vehicle:

2. VTS / Appendix A Section:

3. Requested Specification:

## Decision

The request is not approved. This change could result in a competitive advantage because of the weight savings to the rear axle of the car thereby increasing the entry point for a competitive Porsche 997 Cup car. The 997 chassis is similar to the 996 in this area and these two models have not documented a sufficient need for this change during their tenure in World Challenge.
