Date: April 5, 2008
Regarding: Notes for Long Beach

Parking Schedule at LBGP

Teams are reminded that this year we must paddock on Wednesday April 16th because there are track sessions on Thursday afternoon, so the promoter will start closing the track Thursday morning at 11am. We will start leading trucks over to the paddock area to unload at apx. 9am on Wednesday, from the staging area.

Staging for Direction to Paddock

As in previous years, the staging area is at the South Shore Launch Ramp. A map is attached to this document to show teams how to get to the staging area. Please share this information with your transporter drivers.

Unloading Transporters

Transporters will be lead over from the staging area to the road passing the entrance to the paddock area. Teams will unload their equipment on the road, and move it into the paddock area inside the building. Each car entered will be assigned a paddock space that will be apx. 20 feet x 20 feet. The exception will be the transporter assigned to be parked at the loading dock for each manufacturer. The transporters that will not be at the loading dock will be lead around the track to the holding area once they are unloaded.

Transporters that will be at Loading Dock

One transporter from each of the following teams will be parked at the loading dock just outside of the paddock area to hold spare parts for all the teams from that manufacturer. If a team from another manufacturer competes, they will need to store any spare parts in one of the transporters from one of the manufacturers listed below.

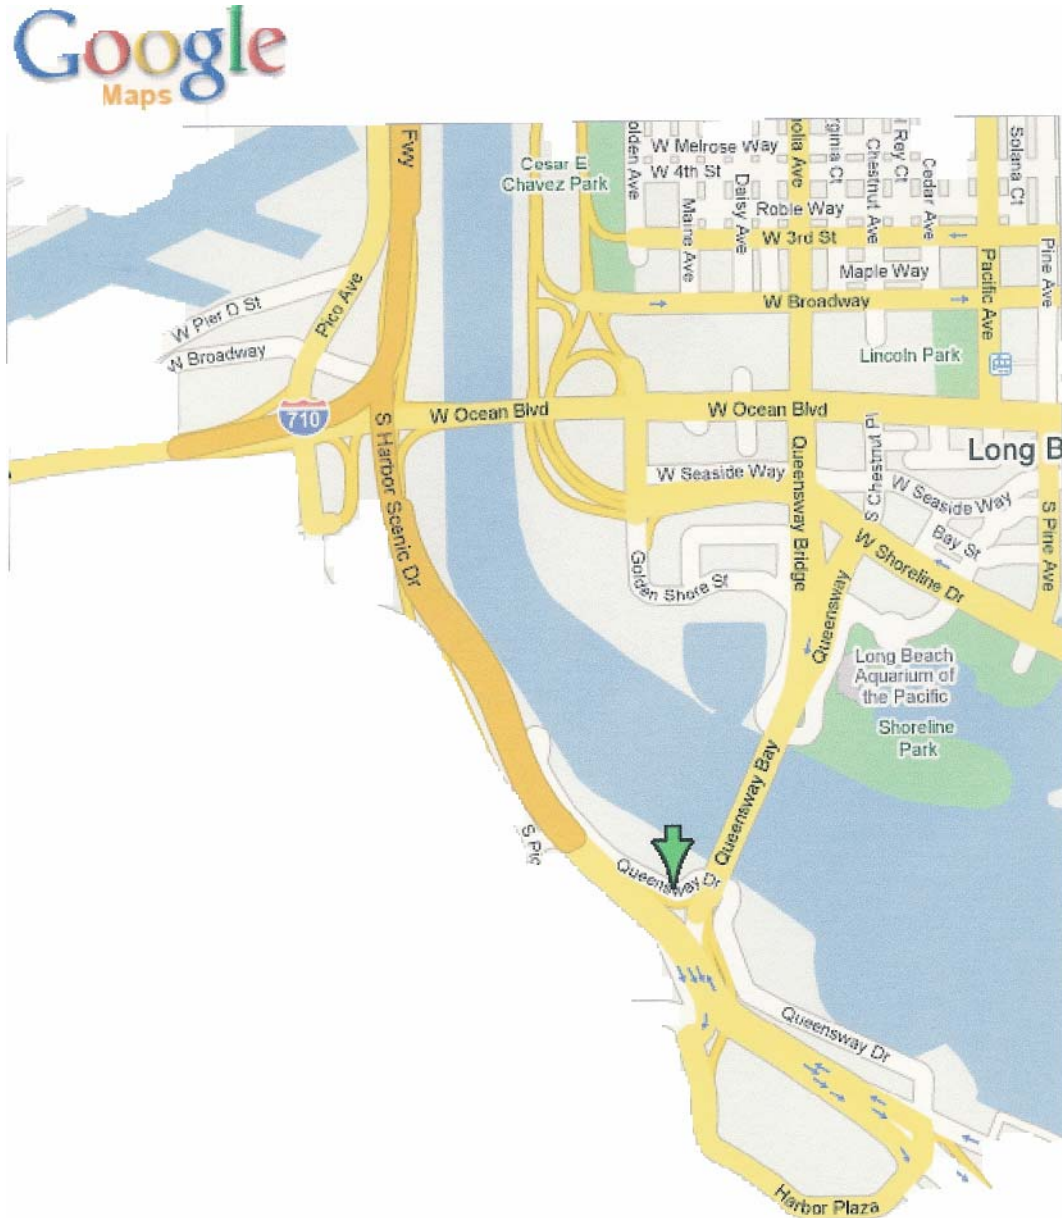

<u>Manufacturer</u>	<u>Team</u>
Cadillac	Team Remington
Chevrolet	Whelen Motorsports
Dodge	Woodhouse Performance
Ford	ACS Express
Porsche	K-PAX Racing
