RE: WCTB # 9 -2007 – Series Wide Weight Changes

Effective Date: Road Atlanta Event

As announced at the Team Owner's Meeting at Mosport, we will be raising vehicle weights across the board for the upcoming rounds at Road Atlanta and Laguna Seca as part of our future direction for the series.

This change is a series wide change not intended to penalize any one car more than any other car. Therefore, it has been decided to increase GT weights by 3.31% (range of increase is 91 to 104 lbs) instead of the originally proposed flat 100 lbs. TC weights will be increased by 1.85% (range of increase is 48 to 54 lbs) instead of the originally proposed 50 lbs.

The Mosport races will be analyzed as normal. Should any adjustments need to be made to any individual brand/vehicle, it will be done separately from this series wide weight change and in accordance with standard Technical Department procedures.

The new Appendix A for each class is attached to this e-mail for your reference.
